

Auto Link

Get smart appliances with Culitec's unique auto link function. Gas and electric hobs are linked to cooker hoods wirelessly so that when you turn on your hob to cook, your cooker hood automatically turns on as well. When you are done cooking, your cooker hood will automatically turn itself off after half a minute.

Cooker Hoods

Culitec cooker hoods are defined by their modern designs coupled with their high performance. Made with high grade materials to ensure durability, these hoods are also equipped with powerful motors that can extract all steam and odours, leaving your kitchen smelling fresh as always. Culitec cooker hoods can be paired wirelessly with either the electric or gas hobs to enjoy the auto link function

Electric Hob

Culitec electric hobs offer an alternative to gas cooking. Induction hobs shorten cooking times, accurately control temperatures and minimise energy consumption by only heating up the base of the pan and not the rest of the surface area. Cooking efficiency is thus 90%. Culitec electric hobs use high quality SCHOTT CERAN black glass surface which offers excellent heat resistance and are easy to maintain.

Modern Kitchen

Culitec – culinary technology. The taste of our mother's or grandmother's cooking stays with us ever since our childhood and we often seek to replicate such flavours. With advancing technology, appliances become savvier and more intelligent while retaining the same tried and tested traditional culinary methods of our parent's times. Culitec aims to bring such cooking appliances to you. Appliances where you can cook the same delicious dishes you enjoyed since young without the hassle and bustle, making cooking a breeze and no more a chore. You too can continue passing on the wonders of Grandma's secret recipes.....
