SALICE

EVOLIFT BI-FOLD LIFT SYSTEM

Evolift lift systems delivers performance-packed functionality in its sleek and contemporary design mechanism. The use of a spring mechanism allowing for wide adjustments ensures that the smoothness and lightness of the opening and closing motion is never compromised while remaining silent at the same time. Evolift is made with sturdy and long-lasting components and yet remains compact enough that the mechanism does not intrude into the usable space inside the cabinet.

Evolift is available in 2 versions-strong or light, and these 2 versions are ample enough to cover most dimensions and weights of commonly used cabinet doors. Evolift can be used with both wooden doors or aluminium-framed doors.

Evolift systems are fitted with mechanism covers that are available in both White or Titanium finish to blend with most cabinet colours.

ITEM CODE: **EBXX-YZ**

where:

XX = Arm length (60; 66; 72; 78; 91)

Y = D or F (D = LIGHT; F = STRONG)

Z = L or Q (Q = WHITE; L = TITANIUM)

Item code is for set of left + right mechanisms + mechanism covers + 3 top hinges + 3 centre hinges
